VENDING MACHINES

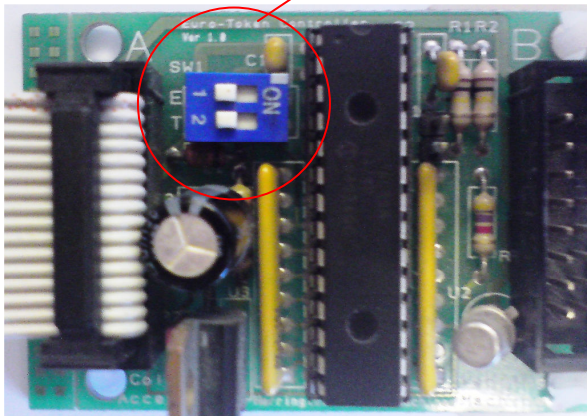

TOKEN SET UP INSTRUCTIONS – Harrington's Machines

To switch your cigarette machine to run on tokens please adhere to the following steps:

For all the older Harrington's machines (the selection buttons run horizontally from left to right), find the small circuit board located underneath the price setting hood.

The small blue and white switch on this board is what controls the activation of token on the machine.

To turn token **ON**, place both switches towards 1 and 2 as shown below.

Once you have the switch moved to the correct side (as shown on the image to the left), plug the machine out, wait 10 seconds and plug it back in.

Then test to ensure that the machine is now operating on token.

Please note, this set up above applies to all machines (Harrington and non-Harrington) in which a Euro Token Board was inserted at the time of the Euro changeover.

Before calling, please check your machine and see if you have one of the above boards. If you have the above board, please follow the steps above. If you do not have these boards and the machine is operating on Euro, you must contact your local agent for those machines.

On the newer Harrington Machines (selection buttons go vertically from top to bottom), simply follow the code below;

1. Press the **Red Button** on the Circuit Board
2. Press and Hold Button **4**, until the display reads **4.23**
3. Press Button **1** until the display counts up to **4.31**
4. Press Button **6** to save these settings
5. Press the **Coin Reject** button to exit back to normal mode
6. Test by inserting tokens and coins

Should you have any questions or queries, then please call 01-8300150.

145A SLANEY CLOSE, DUBLIN INDUSTRIAL ESTATE, GLASNEVIN, DUBLIN 11.
